01 / EXECUTIVE SUMMARY

Electricity at the heart of industrial growth

The 23 July 2026 roundtable connected project needs, technical capabilities and investment support across both shores.

The morning working session brought institutional and business perspectives to the same table.

Building on AMEISS 2025 in Nouakchott, the Las Palmas meeting focused on the energy infrastructure needed to support sustainable industrial growth. Public institutions, financial organisations and private-sector leaders examined opportunities for cooperation between Mauritania and the Canary Islands.

The discussion linked generation and grids with logistics, industrial supply, research and financing. The contributions point towards a common task: translating bilateral relationships into well-defined projects, supported by the technical expertise and institutional networks of both territories.

02 / THE ATLANTIC CORRIDOR

Two shores. One shared agenda.

Geographic proximity gives the partnership a practical foundation. Institutional trust, industrial services and local project knowledge give it purpose.

Regional locator map. The dashed line illustrates the partnership; it is not a transport route. Made with Natural Earth.

The 2026 electricity initiative continued the dialogue opened at AMEISS 2025, with a stronger focus on project development and operational cooperation.

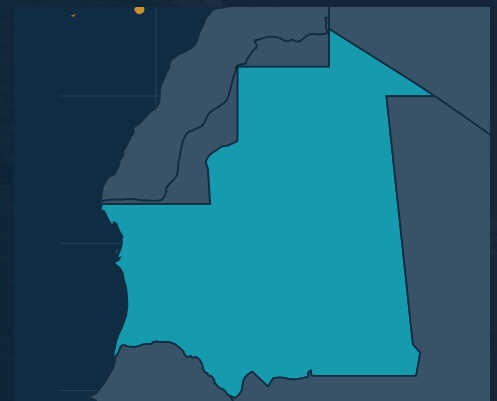

Where the Sahara meets the Atlantic

Energy resources. Industrial ambition.
A platform for long-term partnerships.

The Mauritanian contributions placed electricity infrastructure at the centre of industrial development. Generation, transmission, battery storage and industrial solar projects were discussed alongside gas-to-power and green hydrogen initiatives.

Cooperation needs extend from engineering and procurement to logistics, technical training and project finance.

MAURITANIA

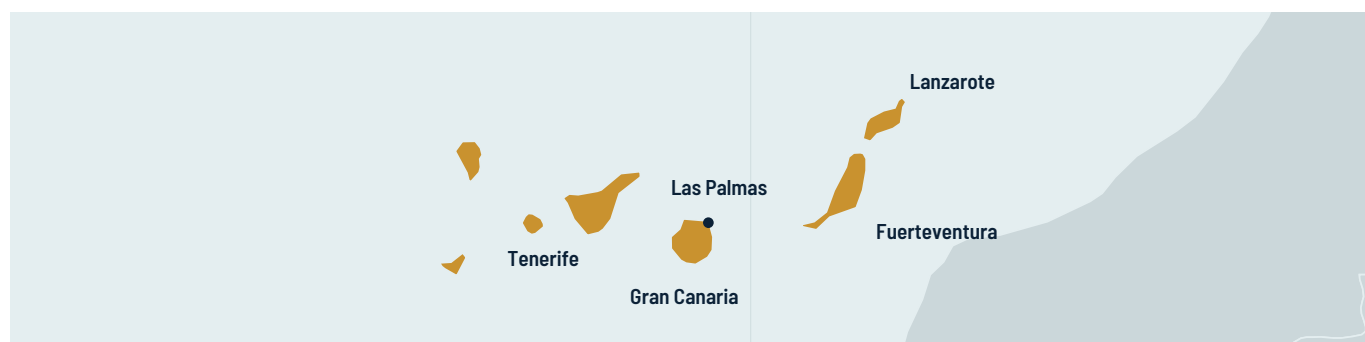

The Atlantic industrial platform

AI-GENERATED GEOGRAPHIC ILLUSTRATION

Technical capacity within reach

The Canary Islands offer a base for industrial and maritime services connecting Europe with West Africa. Participants brought experience in electrical engineering, port operations, ship repair, technical supply and the integration of renewable energy.

The roundtable highlighted how these capabilities can complement Mauritanian projects. Reliable supply chains, specialised training and shared technical work are central to that relationship.

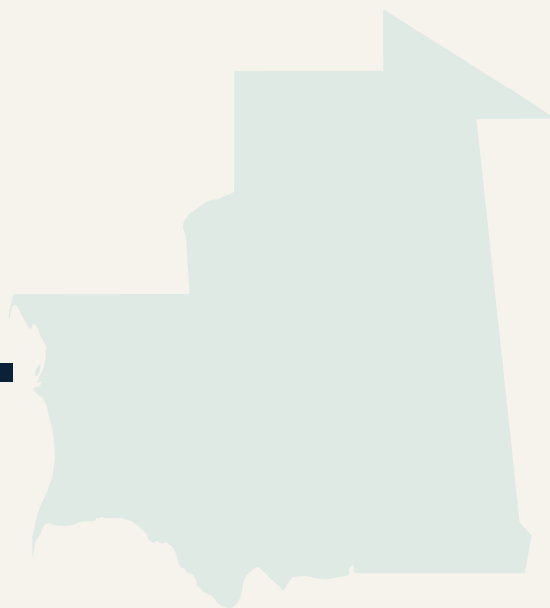

Canary Islands, Spain. Locator map made with Natural Earth.

A WINDOW ON MAURITANIA

Stay ahead. Stay connected.

Agenda

INTELLIGENCE & OPPORTUNITIES

Economic Intelligence

Sector perspectives and analysis for a clearer market view.

Investment Opportunities

Explore projects and opportunities across strategic sectors.

03 / THE MORNING MEETING

Around the table

A working conversation between institutions, project leaders and industrial partners.

Speaking, listening and comparing experience during the morning session at Hôtel LIVVO Lumm.

THE MEETING IN PICTURES

Experience in the room

A multidisciplinary exchange bringing energy, industrial, financial and institutional perspectives together.

A shared reason to participate

Participant responses reflected a common interest in strategic partnerships, investment opportunities and the practical requirements of projects under development.

Knowledge that can travel

Engineering experience, market knowledge, research and industrial services formed a basis for cooperation, technical exchanges and more informed project discussions.

04 / STRATEGIC PILLARS

01

Power generation and gas-to-power

The infrastructure behind industrialisation

Technical contributions during the morning programme.

Generation, networks and storage

SOMELEC outlined electricity infrastructure priorities spanning power plants, high-voltage transmission and battery energy storage systems. These needs were complemented by electrical engineering capabilities presented by Grupo Iprocel and turnkey energy solutions from Clarke Energy.

Gas and renewable energy

The Banda gas-to-power development, presented through TotalEnergies / GoGas, and GreenGo Energy's Megaton Moon initiative brought gas, renewable generation and green hydrogen into the discussion. CEM / CDS added the perspective of industrial solar development and vocational training.

STRATEGIC PILLAR 02

The supply chain behind the project

Industrial supply, logistics and port services

Europe
Canary Islands
Mauritania

Procurement
Maritime services
Technical support
Training

The morning discussions included logistics and industrial-service capabilities.

OnePort Canarias, Zamakona Yards, Scomat, Suisca Group, Maurilog and Servilog brought complementary perspectives on maritime services and integrated land and sea logistics. Scomat presented cooperation with Zamakona Yards around ship repair and technical training in Nouakchott.

Anidia, Valsons Soluciones and Techno Systems contributed industrial supply, procurement and distribution expertise. Their contributions addressed the practical challenge of connecting project requirements with dependable materials, spare parts and technical support between Europe and West Africa.

Cooperation focus: reliable supply chains and local technical capability.

STRATEGIC PILLAR 03

Innovation for the energy transition

Research, decarbonisation and specialised applications

Participants exchanging technical and sector-specific perspectives during the working session.

From ports to public services

The PORMAR Chair at ULP GC brought research on maritime and port decarbonisation, shore-side electricity, green hydrogen and ammonia. Servicio Canario de la Salud contributed its perspective on technological innovation through Salud Cero Emisiones Netas 2030.

Networks and new applications

Red Eléctrica (REDEIA) shared expertise in grids and renewable integration. Sorecan, FIME and Wilson Walton International / Jiro Energy added perspectives on solar generation, industrial partnerships and electric or hydrogen vehicle charging infrastructure.

RESEARCH

KNOWLEDGE TRANSFER

APPLICATION

STRATEGIC PILLAR 04

Enabling investment

Institutional backing, financing and legal frameworks

Investment and financing were part of the morning's technical discussions.

Connecting projects with support

ICEX / the Ministry of Economy presented internationalisation support instruments including FIEM, COFIDES, CESCE and ICO, alongside the role of OFECOMES. Attijari Bank Mauritanie contributed the banking perspective on investor needs and energy-sector development.

Experience, institutions and advice

Kinross Africa / Tasiast shared long-term investment experience in Mauritania. The Mauritanian Consulate, Project Dream and Jiménez Brito Abogados added institutional, project-development, legal and tax perspectives to the dialogue.

Instruments presented: FIEM · COFIDES · CESCE · ICO
Banking, legal advice and institutional cooperation

05 / STRATEGIC CONCLUSIONS

A network ready for the next step

The roundtable demonstrated the breadth of technical expertise and institutional relationships available across the corridor.

Shared experience provided the foundation for further bilateral cooperation.

01 Consolidate the relationships

Maintain the links between project owners, industrial suppliers, researchers and financing institutions.

02 Translate opportunities into projects

Develop the technical, commercial and institutional work needed for cooperation on energy and industrial initiatives.

03 Carry knowledge across the corridor

Connect engineering, training, maritime services and local market experience to support implementation.

06 / THE ROAD AHEAD

Towards AMEISS 2027

Nouakchott / November 2027

The next edition is intended to bring the partnership back to Mauritania, with an emphasis on project consolidation and deeper industrial integration.

2025

NOUAKCHOTT

AMEISS established relationships and shared industrial priorities.

2026

LAS PALMAS

The second stage focused on electricity and practical cooperation.

2027

NOUAKCHOTT

The next edition will provide a forum to review progress and advance partnerships.

The organisations

01 / 04

REPRESENTATIVE AND EXPERTISE

Anidia, S.A.

Carlos Díaz Ortega

Supply of industrial materials, spare parts, and comprehensive technical support.

Attijari Bank Mauritanie

Ibrahim Mounir (Managing Director)

Financial support, investor backing, and fostering energy sector development.

Cátedra Pormar (ULPGC)

Antonio Pulido Alonso

Maritime and port decarbonisation, green hydrogen/ammonia research.

CEM / CDS

Sidi Khalifou (Managing Director)

Solar industrial park projects and vocational training initiatives.

Chariot Group Energy

Mohamed Ethmane (Country Director)

Oil, gas, and green hydrogen exploration; logistics management via Las Palmas.

Clarke Energy

Hamdi Ben Rayana (Business Dev. Manager)

Turnkey engineering solutions for diverse energy applications.

Consulate of Mauritania in Las Palmas

Haki Ahamdi (Deputy Consul)

Institutional accompaniment and bilateral cooperation reporting.

FCC Medio Ambiente

Laura Hernández (Regional Director, Canarias)

Expertise in public services management and urban environmental solutions.

The organisations

02 / 04

REPRESENTATIVE AND EXPERTISE

Federación de Industrias de Minas y Energía (FIME)

Long-term industrial partnerships and mining/energy sector collaboration.

GreenGo Energy

Large-scale renewable energy and green hydrogen development (Megaton Moon project).

Grupo Iprocel

Justo Núñez Quintana (CEO)

High-voltage electrical systems, power plants, and substations across Africa.

HL2 Ingenierías

Hubert Lang Lenton Barrera

Civil and industrial engineering consultancy; permits and project financing.

ICEX / Ministerio de Economía

Héctor Ruiz (Institutional Representative)

Internationalisation support instruments (FIEM, COFIDES, CESCE, ICO, OFECOMES).

Jiménez Brito Abogados, S.L.

María Jiménez

Specialized legal, corporate, and tax advisory services.

Kinross Africa - Tasiast

Gabriela Rúa-Figueroa (External Relations)

Long-term mining investment experience and public-private dialogue model.

Maurilog

Strategic logistics analysis and client operations support in Mauritania.

The organisations

03 / 04

REPRESENTATIVE AND EXPERTISE

Oneport Canarias

José Mayor (President)

International business promotion and connectivity across the African continent.

Project Dream

Support for green hydrogen, Independent Power Producers (IPPs), and mining.

Red Eléctrica (REDEIA)

Ilia Crespo Gutiérrez

Grid enhancement, investment planning, and renewable integration expertise.

Scomat, S.A.

Ismael Hassana (CEO)

Port and land logistics; partnership with Zamakona Yards for ship repair.

Servicio Canario de la Salud

Raúl Falcón

Technological innovation and decarbonisation (Salud Cero Emisiones Netas 2030).

Servilog

Carlos Álvarez

Integrated logistics and transport between Europe and Mauritania.

Siscocan, S.L.

Luis Gálvez

Commercial relations development and business expansion in Mauritania.

Organisation profiles summarised from the participant contributions.

The organisations

04 / 04

REPRESENTATIVE AND EXPERTISE

SOMELEC

Power plants, high-voltage lines, BESS, and upcoming electricity sector tenders.

Sorecan

Juan Jesús Peñate Álvarez

Representation and promotion of solar energy producers in the Canary Islands.

Suisca Group

José Carlos Álvarez

Certified technical supplies, lifting equipment, and maritime/offshore solutions.

Techno Systems

El Moctar Mahmoud Brahim

Logistics platform development in Las Palmas for re-export to West Africa.

TotalEnergies / GoGas

Bebaha H'meiditt (Country Director, GoGas)

Gas-to-power infrastructure development (Banda project) and energy security.

Valsons Soluciones

José Manuel Casado

Multisectoral procurement optimisation across shipping, industry, and trade.

Wilson Walton Intl. & Jiro Energy

Valentín Jiménez González (CEO)

Electric and hydrogen vehicle charging infrastructure, plus mobile charging solutions.

Organisation profiles summarised from the participant contributions.
